Governor Newsom Unveils Blueprint for a Safer Economy, a Statewide, Stringent and Slow Plan for Living with COVID-19

*Blueprint recognizes that COVID-19 will be with us for a long time
and that we all need to adapt and live differently to get through this*

*New plan imposes risk-based restrictions on sectors across state;
expands time between changes*

SACRAMENTO – Governor Gavin Newsom today unveiled the Blueprint for a Safer Economy, a statewide, stringent and slow plan for living with COVID-19 for the long haul. The plan imposes risk-based criteria on tightening and loosening COVID-19 allowable activities and expands the length of time between changes to assess how any movement affects the trajectory of the disease.

Like every aspect of California's response, data and science are the North Star, and as a result, this new framework makes a number of changes to the state's previous resilience roadmap.

Californians can go to covid19.ca.gov to find out where their county falls and what activities are allowable in each county.

"This Blueprint is statewide, stringent and slow," said Governor Newsom. "We have made notable progress over recent weeks, but the disease is still too widespread across the state. COVID-19 will be with us for a long time and we all need to adapt. We need to live

with us for a long time and we all need to adapt. We need to live differently. And we need to minimize exposure for our health, for our families and for our communities.”

The Blueprint builds on lessons learned from the first six months of the disease – and the new scientific understanding that has been collected – to create a new system for regulating movement and COVID-19 transmissions. It includes:

1. At least 21 days to expand activities beyond the initial tier to ensure California better limits the spread of the virus;
2. Mandatory metrics – case rates and test positivity – to measure how widespread COVID-19 is in each county and guide what is allowed;
3. A uniform state framework, with four categories instead of 58 different sets of rules;
4. A more nuanced way of allowing activity: Instead of open vs. closed, sectors can be partially opened and progressively add to their operations as disease transmission decreases; and
5. A new process for tightening back up again quickly when conditions worsen.

Based on recent data, each county will fall into one of four colored tiers – Purple (Widespread), Red (Substantial), Orange (Moderate) and Yellow (Minimal) – based on how prevalent COVID-19 is in each county and the extent of community spread. That color will indicate how sectors can operate.

For example, in the Purple (Widespread) tier where the disease is widespread, restaurants can only operate outdoors. But once a county has achieved a lower level of disease transmission and moved into the Red (Substantial) tier, restaurants can operate with 25 percent capacity indoors or 100 patrons, whichever is fewer.

It relies on two leading health metrics: number of cases per 100,000 residents and percentage of COVID-19 tests that come back positive. In addition, counties will also be required to show they are targeting resources and making the greatest efforts to prevent and fight COVID

in communities and with individuals with the highest risk, and demonstrate improvements in outcomes.

Counties must remain in every tier but purple for a minimum of 21 days before being eligible to move into the next tier. Each Tuesday, California will update each county's data for the previous week and make corresponding changes to tiers. In order to move into a less restrictive tier, a county must meet that tier's criteria for two straight weeks.

Conversely, counties that fail to meet the metrics for their current tier for two consecutive weeks must move to the next most restrictive tier. The plan also includes an "emergency brake" where the state can intervene more immediately for concerning factors like hospitalizations.

Purple (Widespread) is substituted for the previous County Data Monitoring List (which has equivalent criteria to Purple). Schools in the (Purple) Widespread tier aren't permitted to reopen for in-person instruction, unless they receive a waiver from their local health department for TK-6 grades. Schools can reopen for in-person instruction once their county has been in the Red (Substantial) tier for at least two weeks.

The plan also emphasizes that no matter what restrictions the state puts in place, COVID-19 will get the upper hand if Californians don't adapt their behaviors for the duration of the pandemic.

That means, until an effective vaccine is distributed, Californians must wear a mask every time they're with people outside their household. Residents must take activities outside and maintain distance even with loved ones who do not live with them. Californians must realize that the safest place to be is still at home. And the elderly and those with medical conditions should still stay away from others as much as possible.

The Governor today also announced [new PSAs](#) highlighting the dangers of social gatherings during the pandemic and partnerships with Yelp, Facebook, Google and OpenTable, which will now encourage businesses to share COVID-19 safety precautions through

new features so that customers can make informed decisions to protect their health and safety.
